

### **WizLib**

### **General-Purpose Visualisation Library for ODA**

W-W-W Weijo Team

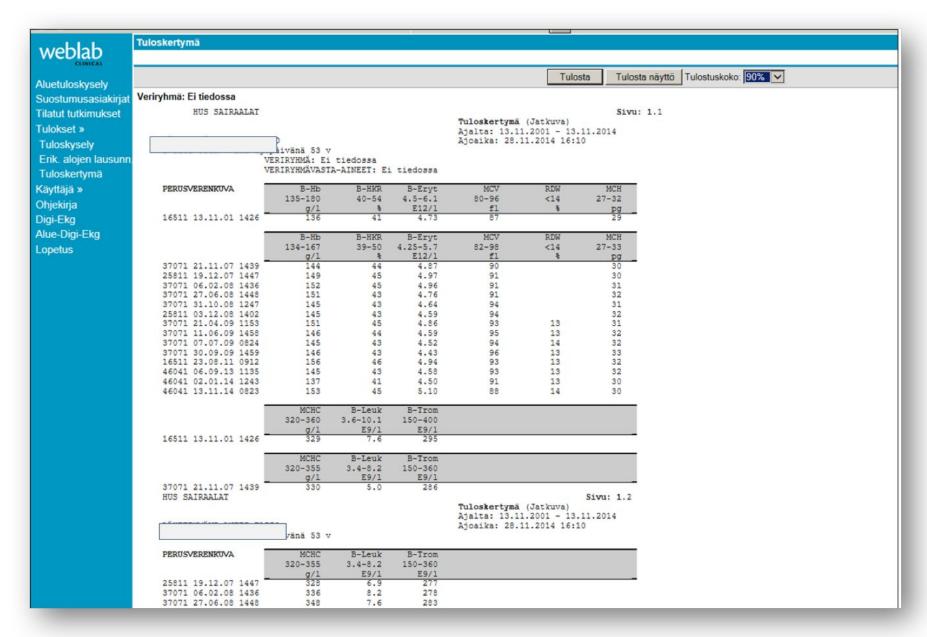

# Layman Health Data Visualisation

**BROKEN** 

### State of the Healthcare 'UX'

 Patients don't understand crowded text-rich screens

Neither do all Professionals

...also, both vary in cognitive capability.

# A Flexible, Reusable Visualisation Library

# A common baseline tool for ODA app family

make it simpler or more complicated per the learned user preferences

# Flexible Visualisation Library

#### **Basic timeline presentation**

- For 1-N components
- Individual measurements points
- 'Ranges' e.g. SYS-DIA pair plot
- Graphs
- Visual cues for self-determining symptom causes

#### **Hygiene features**

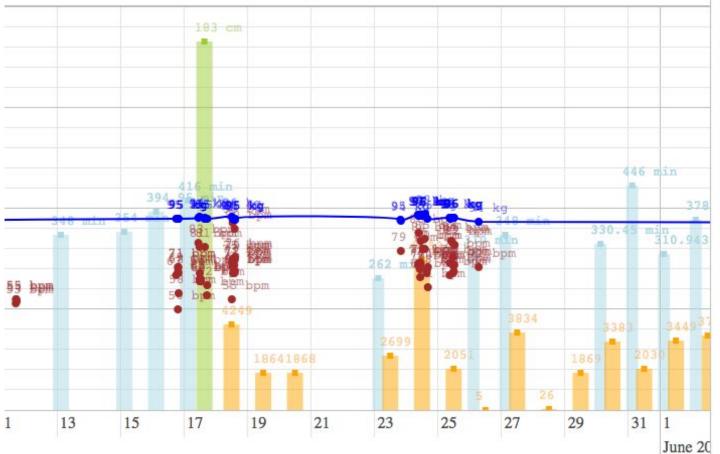

- Axis Autoscaling
- Time window control
- Component selection controls
- Touch and pointer controls e.g. pinch-to-zoom
- Reactive

#### Interactive

- Add annotations by patient or professional user
- Add elements to timeline (file, images, GPX,...)
- 'Likes'

#### Flunssa

Nyt kävi näin

# Demonstrated Setup

# FHIR Resources read via W2E API

Name	LOINC
Blood pressure	55284-4
Diastolic	8462-4
Systolic	8480-6
Heart rate	8867-4
Weight	3141-9
Height	8302-2

## Achievable Gains?

 Common Baseline UI element for timeline data analysis

No need to learn several visualisation UI paradigms

 Re-usable component across future connected health apps/services
